SUMMARY

Data Science student at Menoufia National University with hands-on experience in Python, SQL, Excel, and Power BI, building interactive dashboards and KPI-driven reports. Completed a 100-hour Data Analysis diploma at Eraasoft (2026). Seeking a Data Analyst or Business Intelligence internship to apply analytical and reporting skills in real-world projects.

SKILLS

Microsoft Excel
Pivot Tables, Advanced Formulas, Data Cleaning, KPI Dashboards, Data Visualization

SQL
Querying, Joins, Aggregations, Subqueries, Window Functions, Data Cleaning

Data Analysis
Data Cleaning, KPI Analysis, Trend Analysis, Business Reporting, Performance Analysis

Power BI
DAX, Power Query, Data Modeling, Interactive Dashboards, Drill-through, Bookmarks, Field Parameters

Python
Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Data Visualization (Matplotlib, Seaborn)

PROFESSIONAL EXPERIENCE

Data Analysis Trainee 10/2026
Eraasoft
100-hour program covering data cleaning, analysis, and visualization using Python, SQL, Excel, and Power BI.

EDUCATION

Bachelor of Science in Computer & Artificial Intelligence 09/2025 – Present
Menoufia National University Menofia
Pursuing a Bachelor's degree in Data Science with practical experience in Excel, Power BI, and data visualization, while developing SQL and Python skills through academic and personal projects.

PROJECTS

Adventure Works Dashboard | Power BI
- Built an interactive multi-page Power BI dashboard to analyze revenue, profit, orders, returns, customer segments, and product performance.
- Developed DAX measures and KPI comparisons to track business performance and identify trends across different periods.
- Implemented drill-through, slicers, bookmarks, tooltips, What-If analysis, and dynamic field parameters for deeper interactive analysis.
- Used Azure Maps and advanced visuals such as Decomposition Tree and Key Influencers to uncover geographic patterns and key business drivers.

Maven Market Dashboard | Power BI
- Built an interactive retail performance dashboard to analyze transactions, profit, returns, revenue, and product brand performance.
- Developed DAX measures and KPIs for current-month transactions, profit, returns, profit margin, return rate, and revenue targets.
- Created brand-level analysis with conditional formatting and data bars to compare transaction volume, profitability, and return behavior.
- Added geographic analysis using Azure Maps and country-level filters for the USA, Canada, and Mexico, along with weekly revenue trend monitoring.

- Designed a Revenue vs. Target gauge and combined product, geographic, and time-based analysis into a single business-focused dashboard

Financial Performance Dashboard | Excel
- Designed an intuitive and user-friendly dashboard to support efficient financial analysis and data-driven decision-making.
- Developed interactive visualizations and dynamic filtering to provide meaningful business insights across multiple dimensions.
- Focused on creating a scalable and reusable reporting solution with a clean, professional dashboard layout.
- Strengthened practical skills in Excel dashboard design, data visualization, KPI development, and business reporting.

Dynamic Sales Report Dashboard | Excel
- Built a fully dynamic and interactive sales reporting solution with automatic updates based on selected date ranges.
- Designed clear KPI dashboards and performance visualizations to support sales analysis and data-driven decision-making.
- Implemented scalable Excel formulas and structured data models to ensure accurate, real-time reporting and easy maintenance.
- Enhanced practical skills in Excel dashboard design, data analysis, KPI development, and business reporting.

CERTIFICATES

Data Analysis Diploma, Eraasoft Academy(2026)

Data Analysis Course (100 hours),Eraasoft(2026)
Accredited by the Egyptian Syndicate of Engineers.
